Profile

Policy researcher and programme manager working on industrial policy, firm growth and the economics of the green transition. At the International Growth Centre at the London School of Economics I coordinate a £8.5 million portfolio of 43 projects across 16 countries, engaging ministers, policymakers, practitioners, private-sector partners and donors from commissioning through delivery. I build open data tools on green supply-chain finance and industrial policy, showing how industrial and financial policy can shape a growth-positive and just transition.

Education and Training

MSc Public Policy, Merit, Chevening Scholar

University College London

2020 – 2021

London, United Kingdom

BCom Honours, Finance and Economics, Distinction

University of Delhi

2014 – 2017

Delhi, India

Additional training. MITx MicroMasters in Statistics and Data Science; LSE certificates in Machine Learning Applications in R and Python for Data Science.

Research and Policy Experience

Research Coordinator, Firms, Trade and Productivity

International Growth Centre, London School of Economics

October 2021 – Present

London, United Kingdom

- Coordinate the Small and Growing Businesses and Agri-SME Evidence Funds, a £8.5 million multi-donor portfolio of 43 projects across 16 countries, funded by Argidius, USAID, IDRC and FCDO.
- Own the full delivery cycle for research calls and projects, from strategy and commissioning through proposal assessment, budget and ethics review, contracting, milestone tracking and donor reporting.
- Designed and secured a £250,000 study for FCDO and Unilever TRANSFORM and lead its delivery, examining how small firms integrate into corporate green value chains and finding that green suppliers integrate at roughly one third the rate of non-green suppliers.
- Convene senior government engagement, including a roundtable with Jordan's Ministry of Planning and International Cooperation on female labour force participation and workshops with Zambia's Ministry of Finance on tax policy reform.
- Manage reporting and relationships with FCDO, USAID, IDRC and Argidius, and coordinate engagement with EBRD, IDB Invest, WE-Fi and British International Investment.
- Organised four editions of the annual IGC and Yale Firms, Trade and Development Conference, and translate research on SME finance, productivity and value chains into briefs, presentations and policy webinars for ministers, policymakers and donors.

Earlier Research and Policy Experience

Research Intern

Institute for Employment Studies

September 2021 – December 2021

London, United Kingdom

- Analysed qualitative interviews for the UK Department for Work and Pensions Health-led Employment Trials, contributing to the published [synthesis report](#).
- Produced monthly UK labour-market statistics from Office for National Statistics microdata in R.

Policy Training and Communications Intern

J-PAL South Asia

May 2021 – August 2021

Delhi, India

- Produced three policy memos for the Maharashtra Government, translating impact-evaluation evidence on a private-sector climate-investment programme.
- Built a cost-benefit and social-return-on-investment model for a public higher-education institution.

Research Analyst
Dr APJ Abdul Kalam Centre

July 2019 – August 2020
Delhi, India

- Supported the Chief Executive Officer, Srijan Pal Singh, across his engagement with government ministries and media, and produced his policy writing and policy presentations.
- Evaluated large-scale Government of India employment and housing programmes and prepared analytical briefs on demonetisation, the informal economy and pension models.

Gandhi Fellow
Kaivalya Education Foundation

July 2017 – June 2019
Gurugram, India

- Worked directly with district and village-level government officials to deliver school interventions across 25 villages, founded the Iqra Learning Centre for out-of-school women and girls, and established eight ICT labs later scaled by the Government of Haryana to 110 schools.

Selected Policy and Data Products

- **Green Supplier Finance Lab (2026)**. Built an open, browser-based tool that combines OECD Inter-Country Input-Output data with production greenhouse-gas footprints to map a buyer industry's first-tier supplier emissions exposure and test how different buyer-funded shares split the cost of decarbonisation, separating observed data from financing assumptions.
- **Industry Productivity and Pay Atlas (2026)**. Built an interactive atlas of labour productivity and pay across 27 Indian industries, showing where productivity gains have and have not reached workers as higher pay.
- **NFHS Lab (2026)**. Built an interactive tool for India's National Family Health Survey that explores how health and development outcomes, such as child stunting and sanitation access, move together across states and survey rounds.
- **Open data infrastructure (2025 to 2026)**. Authored four open-source [R packages](#) with DuckDB back-ends for reproducible enterprise and labour-market panels, and built BharatViz, a dashboard integrating enterprise, labour, census and night-lights data.

Policy Writing and Research

- Shukla, R. (2026). *Productivity Up, Wages Flat: How India's Manufacturing Growth Has Stopped Working for Its Workers*. Ideas for India.
- Shukla, R., Harman, O. and Nasir, R. (2026). *Transforming Small and Medium Enterprise Integration into Global Value Chains*. Working paper for FCDO and Unilever TRANSFORM; presented at the Regional Studies Association Annual Conference.
- Shukla, R. (2026). *Noida Is Not a Law and Order Problem. It Is a Delivery Problem*. The Wire.
- Research briefs, conference synthesis products and policy webinars for the International Growth Centre on firm performance, markets, productivity and inclusive growth.

Methods and Tools

Policy and delivery. Programme and grant management; research commissioning; proposal, budget and ethics review; donor reporting; stakeholder engagement; policy briefs and public writing.

Analysis. Input-output and emissions-data integration; panel data; difference-in-differences; impact evaluation; qualitative comparative analysis; interviewing; cost-benefit and SROI modelling.

Software and languages. R (package and Shiny development), Stata, Python, SQL, Excel, LaTeX, Atlas.ti. English C2; Hindi native; French B1.
